

JAIN INTERNATIONAL RESIDENTIAL SCHOOL

SOCIAL UPLIFTMENT

Visit to GYPSY Boys Home, Kanakapura

The **GYPSY BOYS HOME** as the name suggests is a home where boys from tribal villages are looked after as their parents go from place to place for jobs. This is run by a couple who takes care of the children and are sent to a Government school to study. They are provided with food and clothing given to the trust in the form of charity.

The visit to the home coincided with the 50th birthday of one of the staff who wanted to share some time with the boys.

JIRS boys donated small gifts like soaps, toothpaste etc. They played cricket with the boys and went around the house to see the place where the boys stayed. They were sad to see the living conditions of the boys & realised what a comfortable life they led &

decided to help the needy people in some way or the other.

Visit to Kanakapura Government Hospital

Social upliftment is part of JIRS curriculum. Sharing & Caring the under privileged -

The students of grade VII & VIII had an exposure of what poverty is & were able to understand how lucky they were to be born to wonderful parents who take care of them so well.

JIRS provides lunch for about 100 patients at Kanakapura Government Hospital daily.

Our students had an opportunity to serve lunch to all the patients in this Government Hospital with their own hands on 20th June 09. The organised distribution of food with love & care, interaction with the patients touched the innocent hearts of our children. They thanked God that they were lucky to be born in such lovely families which gave them everything '5 Star'.

Students had a memorable experience which would stay in their memories for life long.
