Jain International Residential School

Spurthi Shailendra from Jain International Residential School has secured 132nd rank in medical in the Karnataka Common Entrance

Test 2016. Spurthi, who hopes to get into a good medical college, said that a month-long crash course and mock tests helped her succeed. "I first want to pursue my MBBS and then would like to do my specialisation in cardiology," she added. She attributed her success to the guidance and immense support that she has received from her mentors and parents and said that her ambition was to build a hospital where underprivileged people get special consideration.
